

ARMACOR[®]

Is The Hardworking Hardband

That Keeps on Working Hard

Where other hardbands have failed, Armacor has kept performing and selling itself.

BEST BET. During the 17 years this amorphous metal has been proving itself in the field, 10 similar-purposed metals have appeared on the market. Seven have virtually disappeared. What does that tell us? The law of probability suggests Armacor is the best bet, short term and long term.

MORE ALLOY. You get better performance and life from Armacor because it contains comparatively more alloy. Armacor has remained a choice product on drill pipe for years, not only because it performs, but because it can be welded over again and again.

YOU CAN DEPEND ON US. Armacor has been around a long time. It will be here when you need to reband your pipe and a long time thereafter. To learn more about how you can depend on all of us at Armacor, please visit our website.
